

Remark Office OMR version 12.4
New Features and Enhancements
July 28, 2026

★ indicates customer request

Features and Enhancements:

Remark Data Center:

- ★ **Printing Images:** The ability to print an image from the image viewer toolbar was reinstated.
- ★ **Selecting Grid Data Columns:** You can now hold down the Shift key to select a range of columns in the data grid.
- ★ **General Recognition Updates:** We updated the recognition with and without anchor marks behind the scenes to ensure the utmost in recognition of real-world forms.

Template Editor:

- ★ **Anchor Mark Settings:** Anchor mark settings can now be configured in the Remark Office OMR Template Editor Preferences. These settings help the software properly locate your anchor marks.
- **Anchor Marks Appearance:** The gray area displayed around the anchor marks in the template image has been removed (this was for visual purposes only).
- ★ **Delimited Barcode Update:** Barcodes can now include up to 99 pieces of data within a single barcode.

Fixes:

Data Center/General:

- **Respondent Detection Lookup Column is Empty:** A problem was fixed when running Respondent Detection against a database and the Lookup Column appeared empty.
- ★ **Error 2147467261 Reading Forms:** When processing forms using Auto Form ID an error 2147467261 sometimes occurred when an image wasn't properly recognized instead of putting the image in the unrecognized images queue. Images are now properly queued.
- ★ **Error Saving Large Files to CSV:** An "index out of bounds" error was fixed when saving large files to CSV.

Template Editor:

- ★ **Data Matrix Barcodes:** A problem was fixed where data was shifted when using a Data Matrix barcode with a dash to delimit the data.
- ★ **Error #438 Changing Preferences:** An error #438 that occurred when changing the default orientation of OMR regions in the Template Editor preferences was fixed.
